

Password: Set / Reset Password Guide

Hey everyone! Welcome. Locked out of your account or just need to set up a brand-new secure password? Don't stress, we've got you covered! StayVriksha's password recovery portal is incredibly fast and bulletproof. In this friendly guide, we will walk you through using a quick email OTP validation code to safely update your account details and get back to browsing your favorite stays instantly. Let's jump right in!

Step 1: Heading to the Recovery Gateway

ACCESSING THE PASSWORD RESET MODAL

- **The 'Signin / up' Trigger:** Look at the top-right corner of the StayVriksha homepage! Click the button to pop open the Sign In login dialog box.
- **The Recovery Gateway Link:** Right inside the sign-in modal, look directly next to the Sign In submit button. Spot the blue 'Set / Forgot Password?' link and click it to switch your view.

 "Hey guys! To get started, head over to the top right of the homepage and hit 'Signin / up'. A tidy little login window pops open, and right there below the input fields is our secret passage labeled 'Set / Forgot Password?'. Go ahead and click that, and let's head to the next screen!"

Step 2: Sending Your Verification Request ☒

Set / Reset Password

Email ID*

sai.j.behera@kalpavrikshatechnologies.com

Send OTP

Back to login

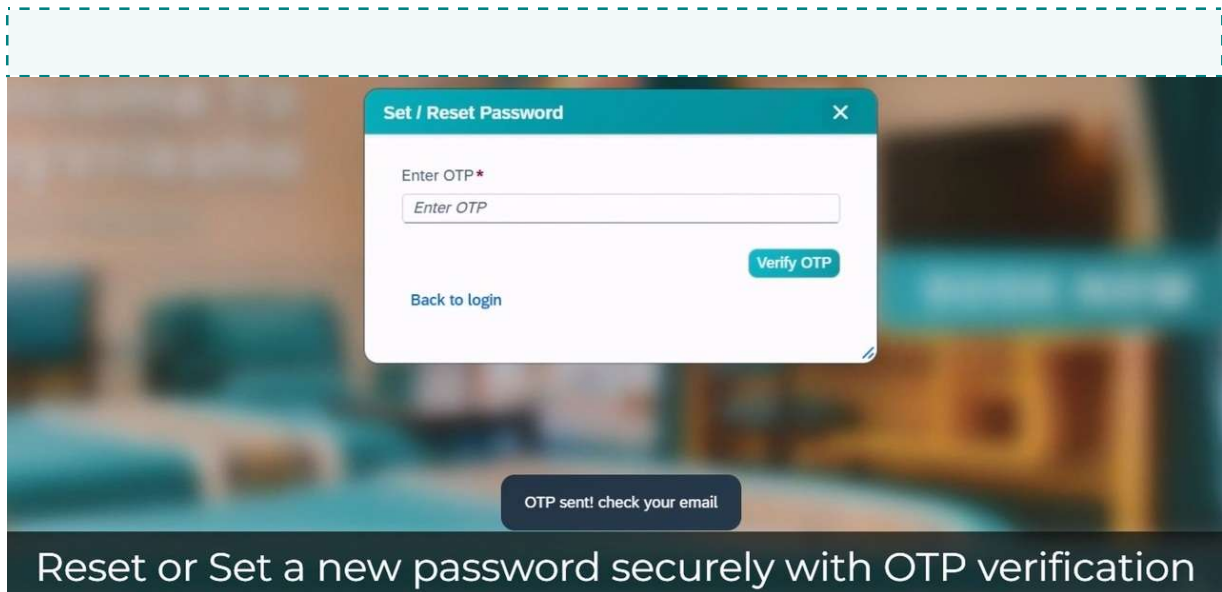

Reset or Set a new password securely with OTP verification

INITIATING THE EMAIL OTP TRANSFER

- **Confirming Your Email ID:** An input form displays asking for your account's primary email address (e.g. your.email@emaildomain.com).
- **Send OTP Action:** Click the teal 'Send OTP' button. This triggers the secure StayVriksha mail servers to generate a unique, temporary security key and dispatch it to your inbox.
- **Back to Login Link:** If you suddenly remember your credentials, you can click 'Back to login' at any time to return to the main sign-in form.

 "Now we are on the Set / Reset Password popup! All you've got to do here is confirm your registered Email ID and click that big 'Send OTP' button. If you change your mind, there's a handy 'Back to login' button right there too. Hit Send, and let's watch the system work its magic!"

Step 3: Verification Code Confirmation

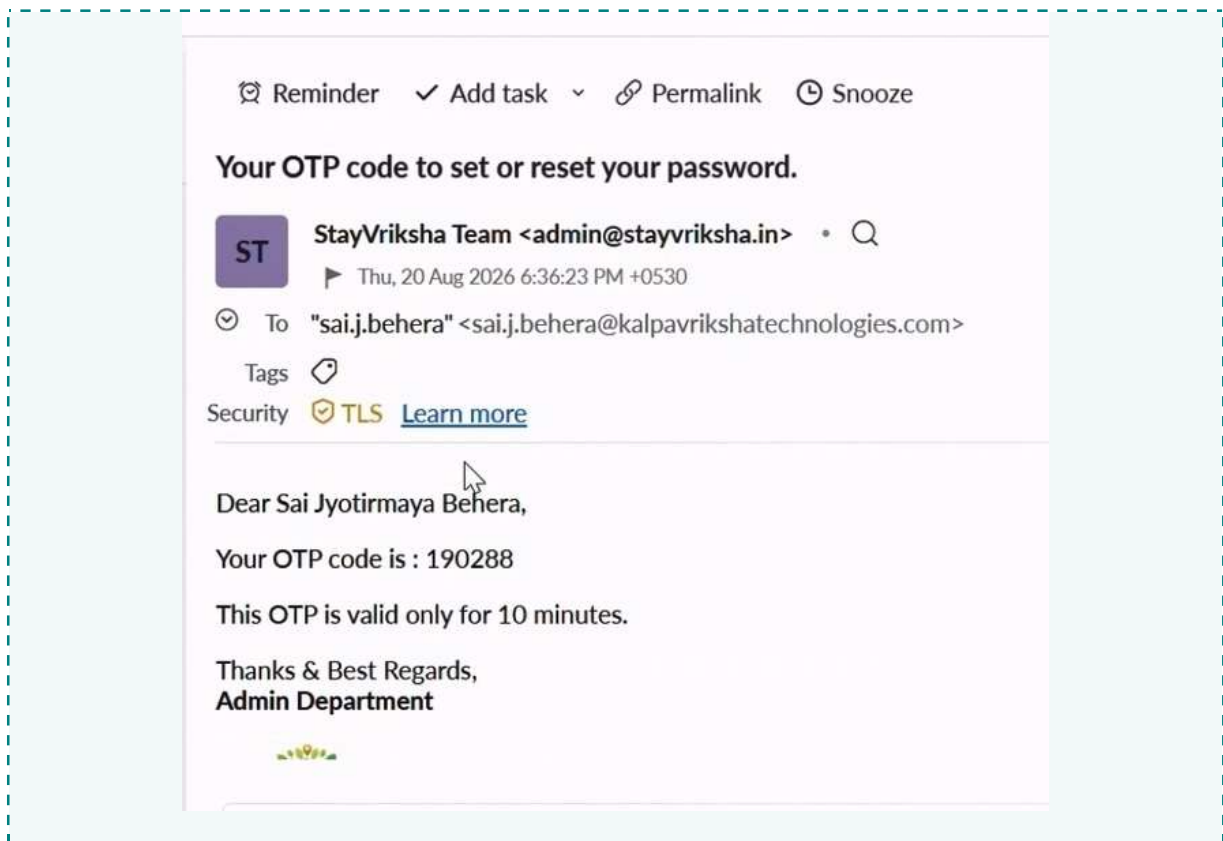

OTP DISPATCH STATUS UPDATE

- **Advanced Dialogue Interface:** The popup screen automatically shifts into the 'Enter OTP' verification step once the email dispatch is complete.
- **Success Toast Notification:** A dark status toast slides onto the screen confirming the action: 'OTP sent! check your email', ensuring you know help is on the way.

 "Perfect! Once you hit Send, the window automatically changes to show the 'Enter OTP' input box, and this cool little toast notification pops up at the bottom saying 'OTP sent! check your email'. That's our cue to head over to our inbox!"

Step 4: Copying the Secure OTP 🔑

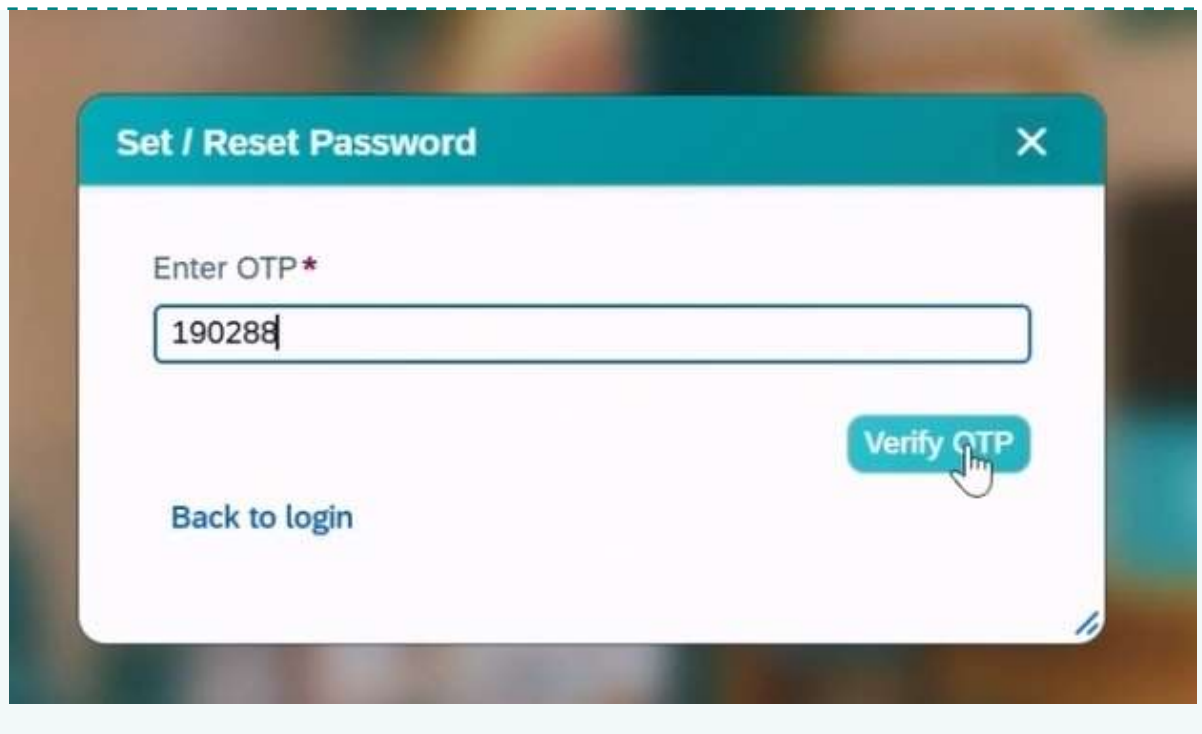

RETRIEVING YOUR TEMPORARY SECURITY CODE

- **The Official Mail Sender:** Open your personal inbox and check for an automated email dispatched from admin@stayvriksha.in.
- **The Secure Code Subject:** The subject line clearly states: 'Your OTP code to set or reset your password.'
- **The 6-Digit Token:** Note down the unique, six-digit numeric code displayed (e.g. 190288). Keep in mind that for security purposes, this token remains active for a strict 10-minute window only!

 "Check your email! You'll find a secure message waiting from the StayVriksha Team with your unique six-digit OTP. Just remember, this code is on a 10-minute countdown timer, so copy it down right away and let's head back to the portal!"

Step 5: Entering and Verifying the Code

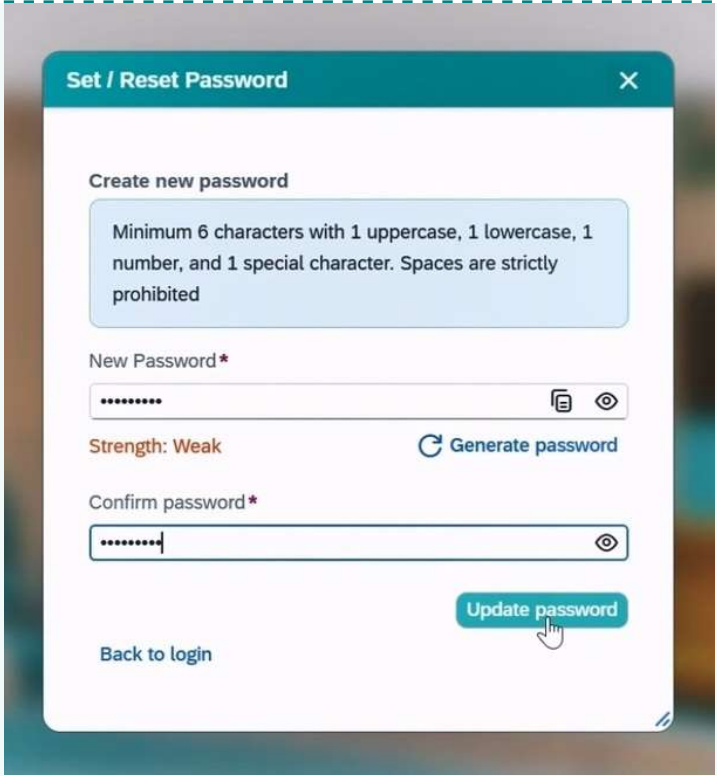

ENTERING YOUR CODE

- **The Input Fields:** Type or paste your six-digit numeric OTP code into the 'Enter OTP' field.
- **The Verification Trigger:** Click the teal 'Verify OTP' button. The platform instantly verifies the security code against the server records to unlock the password setup screen.

 "Back on the portal, type that six-digit code right into the 'Enter OTP' field and hit 'Verify OTP'. This lets the system know it's really you trying to log in, unlocking our final password screen!"

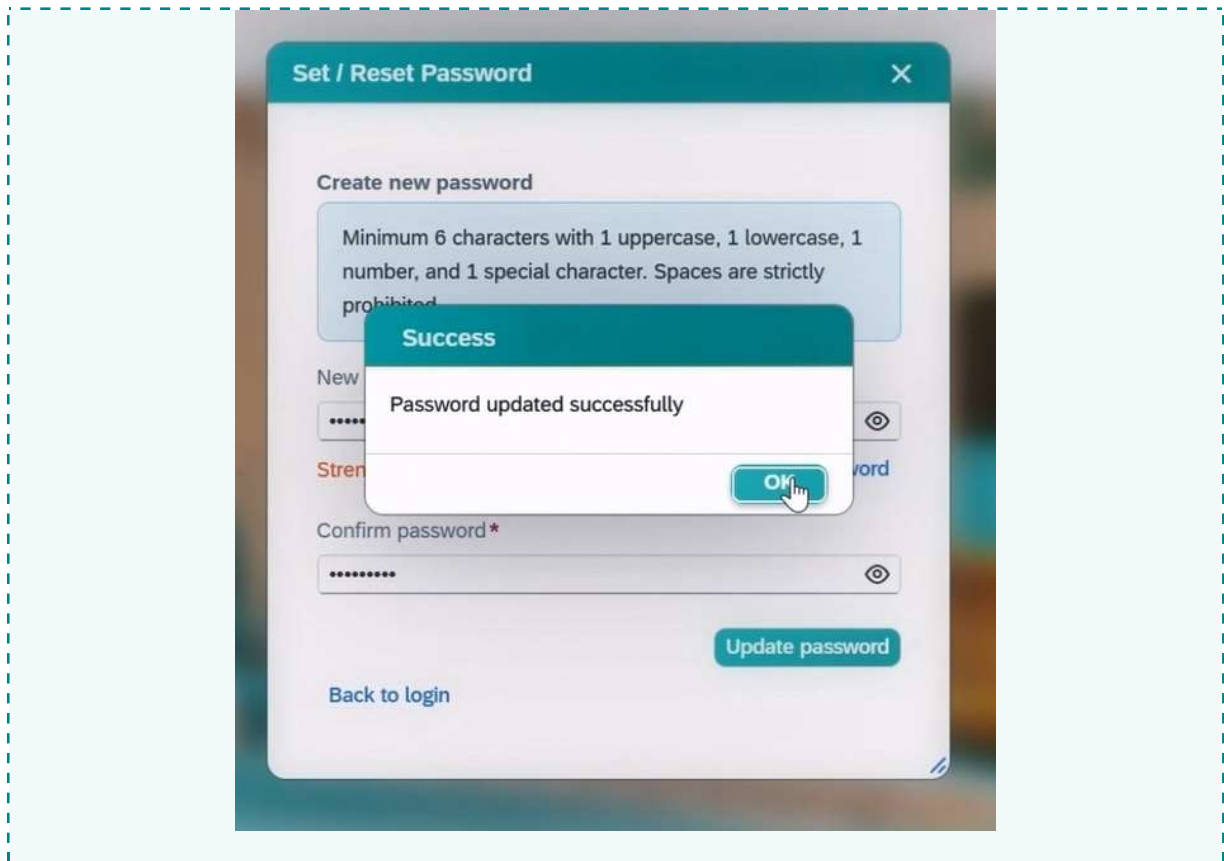

Step 6: Creating Your New Password

PASSWORD COMPLEXITY CONFIGURATION

- **Security Guidelines Block:** A clean blue notification panel reminds you of password rules: Your new credentials must contain at least 6 characters, including 1 uppercase, 1 lowercase, 1 number, and 1 special symbol. Spaces are strictly prohibited!
- **The Entry Fields:** Input your secret password inside 'New Password' and enter it exactly the same way inside 'Confirm Password'.
- **Security Tools:** Use the eye icons to toggle visibility to verify typing, check the strength rating bar (e.g., 'Strength: Weak'), or tap 'Generate password' for an automated secret key.
- **Save Credentials Action:** Click the teal 'Update password' button to submit and save your new credentials to the server.

Step 7: Password Updated Successfully! 🎉

SUCCESS CONFIRMATION ALERT

- **The Dialog Message:** A successful save triggers a popup saying 'Password updated successfully'.
- **Dismiss Alert:** Click the green 'OK' button to clear the success window.
- **Back to Login Redirect:** Tap the blue 'Back to login' button to route yourself back to the primary account entry sign-in form.

🔊 "Boom! A bright success window pops up confirming 'Password updated successfully'. Go ahead and click 'OK' to clear it, and then click 'Back to login' at the bottom to head back to the main sign-in screen!"

Step 8: Sign In with Your New Credentials! ✨

Continue logging in with your new password instantly

COMPLETING YOUR AUTHENTICATION FLOW

- **Standard Credentials Input:** Type in your registered Email ID address in the field.
- **Login Mode Selector:** Check the radio button option next to 'Password'.
- **Secret Code Entry:** Type in your newly updated password, click the eye icon to verify it's typed correctly, and click the teal 'Sign In' button to enter your profile!

🎧 "We are back on the Sign In page! Type in your email, select 'Password' as your login method, and type in your brand-new secure password. Click 'Sign In' and congratulations—you are officially logged back into StayVriksha!"
